

National Manufacturing Debate

21 May 2019

Terry Scuoler CBE
Chairman

Terry was appointed Chairman of the Institute of Export and International Trade in November 2017 and TRS in 2018. Prior to taking up these roles he served for eight years as CEO of the Engineering Employers Federation (EEF) during which time he helped to substantially raise the profile of British manufacturing and engineering with Government and other major stakeholders.

He is also an advisor to Santander on industrial strategy.

In 2000 he led a Management Buy In (MBI) of Ferranti Technologies, a former underperforming business unit of Ferranti International and turned the company around into a highly profitable business, the success of which he puts down to a strong commitment to invest in technology and a focus on training and developing skills at all levels.

Terry has sat on numerous Ministerial Committees and through his role at EEF has been a major contributor to a number of Government White Papers and Reviews including those on Brexit, Industrial Strategy, Corporate Governance, Skills and Energy Pricing.

His passion and commitment to manufacturing and the enterprise culture is undoubted.

In 2017 he was awarded the CBE for services to manufacturing and engineering.
