

# National Debate on Resilience in the Water Sector

Wednesday 22 May 2024

**Peter Hammond**  
Windrush Against Sewage Pollution

Peter Hammond trained in mathematics at Oxford University and in computer science and artificial intelligence at Imperial College.

His last posts in a 40yr career were Professor of Computational Biology at UCL's Institute of Child Health and Senior Fellow in Medical Image Analysis at Oxford University's Big Data Institute, analysing neurofacial anatomy for use in epilepsy, medical genetics and teratology.

Recent visiting research posts were at Dept. of Human Genetics, Leuven University, Belgium (2017-21) and UK Centre for Ecology & Hydrology (2018-20), the latter arising from an interest in river pollution and using artificial intelligence to detect sewage spills.
