

# Communications Electronic Warfare

## PgCert

This PgCert covers a selection of Electronic Warfare topics relevant to military communications systems, including the specification, analysis, development, procurement and technical management of military information systems. The course has been designed for officers of the Armed Forces and for scientists and technical officers in government defence establishments and the defence industry. Graduates achieve a high level of understanding and detailed knowledge of military communications and sensor systems with particular regard to electronic warfare. The main focus of the course is to provide a good understanding of Electronic Warfare in relation to communications systems, before considering how to defend them from electronic attack or intercept.

### Course structure

PgCert students must complete a taught phase consisting of five specified modules. The course is delivered via lectures, laboratory demonstrations and tutorials. The teaching of the modules is reinforced by visits to relevant outside organisations which are scheduled outside of teaching periods.

### Future career

Successful graduates of this course should be fully equipped for roles in defence intelligence, systems development and acquisition, involving the specification and analysis of such systems, working individually or as part of a team either in the military or in the defence industry.

### Example modules

#### Compulsory:

- Electromagnetic Propagation and Devices,
- Signal Processing, Statistics and Analysis,
- Communications Principles,
- Communications Systems 1 and 2,
- Information Networks.

#### Duration:

PgCert: part-time - two years.

#### Start date:

September.

#### Location:

Shrivenham.

#### Entry requirements:

A first or second class honours degree or equivalent in an appropriate discipline (usually electronics, electrical engineering or physics). Alternatively, a lesser qualification with relevant professional experience may be acceptable.
