

Environmental Management for Business MSc

www.cranfield.ac.uk/emb

Study for a successful and impactful environmental management career

Meeting the challenge of sustainable business, which strives to balance environmental, social and economic risks and opportunities, requires innovative knowledge, skills and tools. This MSc will equip you with advanced theoretical knowledge and help you to develop practical and professional skills to positively address sustainability issues in the real world. You will critically evaluate complex environmental issues, develop effective strategies and lead their implementation to enable an effective and sustainable future. This unique MSc integrates business acumen from our globally renowned Cranfield School of Management, as well as environmental expertise from our leading environment academic team, to prepare you for a successful career in sustainable and environmental management.

Who is it for?

The Environmental Management for Business course is open to students from a range of academic backgrounds, including science and engineering, business and social sciences, who wish to develop a successful and rewarding career in environmental management. Specifically designed to meet the demands of global employers, it will equip you with current thinking on environmental issues, the ability to develop effective environmental management strategies, and the leadership skills you will need to bring your ideas to life.

Your career

With the urgent global focus on environmental issues and natural resource management, you can expect to be highly sought after by employers. Successful students develop diverse and rewarding careers in environmental and business consultancies, manufacturing and service industries, public sector organisations such as environmental protection agencies, together with non-governmental organisations.

Overview

Entry requirements

We welcome applications from talented individuals of all backgrounds and each application is considered on its individual merit. Usually applicants must hold:

A UK lower second-class (2:2) undergraduate degree with honours, as a minimum, or equivalent international qualification.

Ideally applicants will have studied in science, engineering, social science or business related discipline.

Find information about equivalent qualifications in your country on our International entry requirements page.

Fees

Please see www.cranfield.ac.uk/fees for detailed information about fee status, full-time and part-time fees as well as deposit requirements and bursary and scholarship information.

Course details

This course comprises eight modules, an individual project and a group project.

Part-time students normally complete individual dissertations in place of the group project.

Modules

Keeping our courses up-to-date and current requires constant innovation and change. The modules we offer reflect the needs of business and industry and the research interests of our staff. As a result, they may change or be withdrawn due to research developments, legislation changes or for a variety of other reasons. Changes may also be designed to improve the student learning experience or to respond to feedback from students, external examiners, accreditation bodies and industrial advisory panels.

To give you a taster, we have listed below the compulsory and elective (where applicable) modules which are currently affiliated with this course. All modules are indicative only, and may be subject to change for your year of entry

Compulsory modules

All the modules in the following list need to be taken as part of this course.

Select one from the list below:

Energy Systems Case Studies

Engineering Design and Project Management

"I chose Cranfield because it's a very versatile course, it gives you a lot of background in environment and sustainability in a very broad sense. Cranfield has helped me step out of my comfort zone and push myself towards being a better version of myself. The intensive year really helped me a lot. It was a great experience."

Vivek Jha

Regulatory Compliance Officer - International Waste Shipments, Environment Agency, Environmental Management for Business MSc, 2021-22
