

Management and Corporate Sustainability MSc

www.cranfield.ac.uk/som/mscmims

Our approach to teaching is designed to nurture your practical business skills and confidence, and places huge emphasis on real-world challenges.

Corporate sustainability has never been more relevant to our organisations. Our Management and Corporate Sustainability MSc will teach you the practicalities of how businesses successfully embed sustainability into their core business purpose and strategy.

Our master's in Corporate Sustainability provides you with practical knowledge and skills required for all senior leadership positions. It shares course content, including modules and other course activities, with our top-ranked Management MSc course, which is ranked 6th in the UK and 28th in the world by QS World University Rankings: Masters in Management Ranking 2022.

Who is it for?

- Graduates with a keen interest in the social, environmental and economic impact that organisations have on the world, and who aspire to embed sustainability into their future management career across a varied range of private, public and not-for-profit organisations, sectors and roles.
- Early career professionals who wish to transition into a sustainability-focused role.

Your career

At Cranfield you will receive support to help you plan an effective career strategy, whether you are looking to secure your first role in corporate sustainability, or wanting to take your career to the next level. The Careers and Employability Service will help you to plan your personal and professional development and provide you with lifelong career management skills.

Our Management and Corporate Sustainability MSc graduates have secured jobs with a diverse range of companies including Coca-Cola Enterprises, Deloitte, Facebook, Heineken, SIRE Life Sciences, USB Asset Management and Veolia. Their roles have included Business Analyst, Senior Consultant, Research Associate, Project Officer and Business Integrity Associate.

Cranfield campus

Entry requirements

We welcome applications from talented candidates of all backgrounds and each application is considered on its individual merit. Usually candidates must hold either

- First or a 2.1 UK honours degree in a relevant discipline, or
- an international qualification of a standard equivalent to a First or 2.1 UK honours degree

Candidates who do not meet these criteria may be considered if they have a professional qualification (e.g. CIMA, ACA, ACCA) together with 5 years' post-qualification relevant work experience. Other relevant qualifications, together with significant experience, may be considered.

We accept a range of qualifications from different countries – learn more about international entry requirements.

If you are currently studying at a Chinese university, please view our specific entry requirements for further study at Cranfield School of Management.

Fee

20% scholarships for all successful UK applicants

Please see www.cranfield.ac.uk/fees for detailed information about fee status, full-time and part-time fees as well as deposit requirements and bursary and scholarship information.

Course details

The course comprises twelve modules, seven covering general management skills and five specialising in corporate sustainability. The 'Creating Sustainable Organisations' module provides the opportunity to undertake a practical sustainable business consultancy project. The thesis is also a practical exercise, albeit informed by up-to-date theory. Previous thesis projects have involved working with company sponsors such as Heineken, Unilever, National Rail and easyJet. The 'Leading Corporate Sustainability' module provides practical leadership skills in driving sustainable business, from strategic issues such as the circular economy to topics such as sustainable innovation, reporting and employee engagement. The 'Applied Science and Technology for Environmental Sustainability' module is taught by environmental experts from Cranfield's School of Water, Energy and Environment, and provides the specialist skills needed to assess and manage environmental impacts from operations to the supply chain.

Modules

Keeping our courses up-to-date and current requires constant innovation and change. The modules we offer reflect the needs of business and industry and the research interests of our staff. As a result, they may change or be withdrawn due to research developments, legislation changes or for a variety of other reasons. Changes may also be designed to improve the student learning experience or to respond to feedback from students, external examiners, accreditation bodies and industrial advisory panels.

To give you a taster, we have listed below the compulsory and elective (where applicable) modules which are currently affiliated with this course. All modules are indicative only, and may be subject to change for your year of entry

Compulsory modules

All the modules in the following list need to be taken as part of this course.
