

Revolutionizing Energy Systems: AI and Blockchain

30 January 2020

Kevin Gill

**IBM Distinguished Engineer,
Global Business Services, CTO GBS Blockchain**

Kevin is the CTO of IBM's European Blockchain Global Consulting Organisation. Kevin both sells and solutions our most complex blockchain implementations. Kevin has delivered blockchain implementations across Insurance and Financial Markets, as well as solutioning blockchain implementations across most other sectors – including Shipping; Supply Chain; Reinsurance; Trade Finance & Trade Credit Risk Insurance.

Kevin has a background in business transformation and is passionate about the ability of blockchain to provide game changing transformational propositions across business networks.

Prior to Blockchain, Kevin was the IBM UK Insurance CTO and also led the Business / Enterprise Architecture Capability in UK. His global experience covers business process management, integration using service oriented architecture, as well as designing and delivering complex systems integrations required for legacy transformation. Kevin has worked extensively in Public & FSS banking sectors, as well as Industrial & Health. Kevin has led the technology & process aspects of many large FSS transformation programmes, as well as complex secure delivery programmes in Defence & Security.

Kevin regularly presents at blockchain conferences and is responsible for our blockchain architect community and regularly teaches blockchain methods.
