Dr Evi Petavratzi
Senior Mineral Commodity Geologist

Dr Evi Petavratzi is a Senior Mineral Commodity Geologist at the British Geological Survey (BGS), with over 13 years of working experience in industry, academia and the public sector. At BGS, her research is in the field of security of supply and the circular economy, with a focus on decarbonisation and resource management. She has been involved in several multidisciplinary projects in the areas of critical raw materials, material flow analysis and the enhancement of the European knowledge base for raw materials. She holds a PhD in Mining Engineering and is a Fellow of the Chartered Institute of Waste Management and a member of the Institute of Materials, Minerals and Mining (IOM3).
