

# Tuition fees

## Research degrees

2021-22

### Important notes about fees

The fees outlined within this document apply to all students whose initial date of registration falls on or between 1 August 2021 and 31 July 2022. All students pay the tuition fee set by the University for the full duration of their registration period agreed at their initial registration.

Eligibility of Home fee status is determined with reference to UK Government regulations. As a guiding principle UK or Irish nationals who are ordinarily resident in either the UK or Republic of Ireland pay Home tuition fees. All other students (including those from the Channel Islands and Isle of Man) pay Overseas fees.

Updated 28 January 2021

## Research degrees

A tuition fee deposit of £500 is required when accepting an offer of admission. Deposits will be deducted from the cost of the tuition fee and are usually non-refundable, except where an acceptance of offer is withdrawn within 14 calendar days of paying the deposit, or where there are exceptional and unforeseen circumstances that prevent an applicant taking up their place. Please read our guidance on [refunding tuition fee deposits](#).

For some research courses, an Additional Fee Element (AFE) will be payable in addition to the published research tuition fee. The AFE covers additional costs associated with, for example; programme management support, support from specialist laboratory technicians, access to specific and specialist technical equipment, facilities and analytic equipment. The AFE is chargeable at 'Technical' and 'Non-technical' rates, 'Non-technical' research degrees will normally be desk-based projects. Note that there may be some desk-based projects which rely on the existence of the University's technical infrastructure and these will be classed as 'Technical'.

An extra, bespoke AFE may also be added to either the 'Non-Technical' or to the 'Technical' AFE. This is to cover Non-standard costs which are incurred as a direct consequence of the research degree, e.g. significant external expertise, equipment or resources bought into Cranfield specifically for the project.

All studentships (Home and Overseas) may attract an extra Direct Operational Cost (DOC) if the project is likely to require particularly expensive consumables e.g. enzymes. This cost should be discussed with the supervisor and will be included in the offer letter.

As each research project is different, the AFE and DOC are calculated on a student by student basis. Applicants will be able to discuss whether or not their course will incur an AFE, and at what level, with their proposed supervisor. Any agreed AFE and/or DOC will be included in the offer letter for the course even if it is not being charged directly to the student.

Additional charges will apply for extensions of registration. This will be made up of a monthly extension fee plus the AFE on a pro rata basis. Therefore the amount charged will depend on the duration of extension.

*All prices are on a per annum basis.*

	Full-time		Part-time		Non-technical AFE		Technical AFE		Typical duration		Monthly extension fee
